

APPLE TREE

International School

MIRPUR DHAKA

ENGLISH MEDIUM SCHOOL
UNDER SWEDISH MANAGEMENT

Apple Tree International School was established in 2006. The school is registered with The Secondary and Higher Secondary Education Board, Dhaka.

Apple Tree International School is a Cambridge Associate School under Cambridge Assessments (former Cambridge International Examinations, CIE) and a registered member of Cambridge Primary.

After three years in Mirpur 11, the school moved to a newly constructed building in Pallabi 2009. From 2012 a second campus was added in Pallabi. In 2017 a third campus is added in Rupnagar. All three campuses have been reconstructed for school purpose.

Apple Tree International School is a private school under Swedish Management.

The owner and principal Yam Bergstrand is a Swedish citizen living in Bangladesh. Between 1970 and 1995 he worked as an actor, director and journalist in Sweden. Since 1990 he has also worked as a teacher and child counselor.

In 1994 he was invited by Group Theatre Federation to conduct workshops for young actors in Dhaka through a grant from The Swedish Institute. During the visit he came to know Nasiruddin Yousuff and the late Selim Al Deen of Dhaka Theatre. He came back several times around 2000 to work with Dhaka Theatre and to translate the stage play Hargaj by Selim Al Deen to Swedish.

In addition to his cultural and educational career Yam Bergstrand has worked as a software developer for the last odd twenty years, designing control systems for Swedish iron and steel industry.

We want our students to recognise and honour their Bangladeshi heritage and to build a strong identity with a deep feeling of responsibility as citizens of their country.

21 February

International Mother Language Day is commemorated with a cultural programme where both students and teachers perform

26 March

On Independence Day we listen to first hand recollections of 1971 from invited guests.

14 April

Bengali New Year is celebrated with different artistic workshops; painting, pottery painting and simple handicraft.

In an ever-changing world, you must be able to adapt to new challenges in the work place. We believe that one of the most important things with education is to fill students with enthusiasm for learning and studying. This is the significance of our school motto:

“An Independent Life of Learning”

Core Subjects

English

Language development is a wide-ranging process, involving speaking, reading and writing. A phonological approach is used in preschool, followed by creative and process writing. Project presentations and debates improve spoken skills, and carefully selected literature books will enrich both language and cultural understanding at primary and secondary level.

English serves as a bridge that connects employees across countries and cultures, weaving networks for innovation.

Increasingly, countries view English as a catalyst for development. The most essential shift is towards communicative teaching; i.e. English as a tool for communication.

Bengali

is a core subject at Apple Tree. Without the proper knowledge of their mother language, and the culture and history that envelops it, students may not be able to master a second, foreign language. We expect all students with Bengali as their mother tongue to sit for Bengali in their O Level.

Mathematics

The abstract world of Mathematics is taught from practical touch-and-count approach in preschool to more complex strategy building in primary school. We develop students' number sense in preschool; meaning counting, ordering, sorting, understanding the properties of shapes and to recognise simple patterns. Gradually students learn to make models and to develop strategies for problem solving. We want them not only to learn mathematical rules, but learn how to think in a logical, mathematical way.

Computer Science

Information and Communications Technology is increasingly being regarded as a new 'literacy', alongside reading, writing and numeracy. To be able to communicate via e-mail, to handle information in databases, to understand how to use Internet for research, to understand website design and animation is becoming a necessity for your future career.

Technological advances are helping students learn English more effectively. In countries where English proficiency is high, Internet penetration is also high.

From Grade 1 students have regular classes in their campus Computer Laboratory.

Preschoolers are encouraged to learn how to operate computers, use the mouse and play educational games. From Grade 1 students learn how to use different types of software for project presentations. Later they learn basic programming through HTML, MS LOGO, Scratch and other tools. From Grade 6 they are introduced to Python and other programming languages and features included in the O Level examinations.

Digital equipment

Computers, cameras and other digital equipment form an integral part of our education, and are used whenever it serves a pedagogic purpose. Individual students or groups may use word processor, spread sheets, paint programmes and other software for classroom projects. Internet and web resources are used for research, international projects and for regular classroom work.

All campuses have fiber Internet connection.

Campus 1 and 2 has a cable network, and Campus 3 is a WiFi zone.

All three campuses are connected to the same intranet.

Laboratories

Campus 3 has separate modern and scientifically equipped laboratories for Chemistry, Biology, Physics and Computer Science.

Campus 1 Playground

On the ground floor there is a climbing wall and jungle frame, basketball hoop, floorball and table tennis to allow students to move and relax.

Campus 2 Playground

To develop our students' fine motor skills there is a big sandbox on the ground floor where they play with buckets and other sandbox toys. For gross motor skills there are balls, skipping ropes and big space to move around on the roof top. There are also two playrooms for silent indoor play.

Campus 3 Recreation area

On the ground floor there is table tennis, floorball and soft tennis for team play. The roof top is also available for outdoor play.

Libraries

Each school campus has a library with fiction and non-fiction literature both in English and Bengali.

From Grade 3 all students have Library time on their routine where they will be introduced to different types of books and encouraged to explore books on their own. All classrooms in campus 2 have their own collection of story books for reading practice.

Main Library Campus 3

The main library in campus 3 also holds reference books, dictionaries, daily newspapers and magazines creating rich resources of information for various classroom projects. The main library has workplaces for individual studies and facilities for group work and research.

From Cambridge - a guide for parents

Cambridge Assessment International Education prepares school students for life, helping them develop an informed curiosity and a lasting passion for learning. We are part of the University of Cambridge.

Your child's needs as a learner are at the heart of our approach to education. Our programmes and qualifications aim to give your child a love of learning that will stay with them through school, university and beyond.

A global learning community

With a Cambridge programme, your child is joining a community of learners from more than 10000 schools in over 160 countries. We have created our programmes and qualifications for students worldwide but we make sure there is plenty of space for local content too.

Distance does not create a barrier between Cambridge learners around the world. Our online communities bring schools and learners together to discuss their projects and activities. By developing a global outlook in Cambridge learners, we aim to equip them for success in the fast-changing modern world.

Cambridge Primary

Cambridge Primary is an education programme for learners aged 5 to 11 years.

Cambridge Primary develops learners' skills and understanding through the primary years in English, mathematics and science. It is offered by more than 1300 primary schools in over 110 countries worldwide.

Cambridge Secondary 1

Cambridge Secondary is an education programme for learners aged 11 to 14 years that builds skills, knowledge and understanding in English, mathematics and science. Cambridge Secondary builds on the foundations of Cambridge Primary. Cambridge Secondary is offered in over 130 countries worldwide. It develops learners' skills in English, mathematics and science, and is offered by nearly 2300 schools in over 130 countries.

Art and Design lesson

Science Fair

Cambridge Primary Checkpoint is a test for learners in the final year of Cambridge Primary.

Cambridge
**Primary
Checkpoint**

These tests are available in English, mathematics and science.

Cambridge Checkpoint tests can be taken in the final year of Cambridge Lower Secondary. These tests are available in English, mathematics and science.

Cambridge
**Secondary 1
Checkpoint**

This helps your school to advise on different progression routes after age 14 and choose the one that will be most suitable for your child.

The Checkpoint tests are marked in Cambridge and provide schools with an external international benchmark for learner performance. Each learner receives a statement of achievement and a diagnostic feedback report, giving schools detailed information and parents extra trust in the feedback they receive.

Apple Tree International School admits students from Playgroup to Cambridge O level

The academic year at Apple Tree extends from July through June. The first semester runs from school start to winter vacation, the second from January to final examinations.

From Playgroup to grade 2 school provides both morning and dayshift classes.

	Age August 31, 2018	Appropriate Grade
Preschool	3+	Playgroup
	4+	Nursery
	5+	Kindergarten
Primary School	6+	Grade 1
	7+	Grade 2
	8+	Grade 3
	9+	Grade 4
	10+	Grade 5
Secondary School	11+	Grade 6
	12+	Grade 7
	13+	Grade 8
	14+	Grade 9
	15+	Grade 10

You can collect application form and admission procedures from the school office or download them from our web site.

Admission for school year 2018-2019 opens January 2, 2018.

Admission Phone: 01768 737 907

There is no annual or re-admission fee at Apple Tree International School.
